

Rolling Service Doors

Model ESD10

Practical Design Applications

- Industry
- Distribution
- Healthcare
- Transportation
- Retail
- Utilities
- Education
- Hospitality/Public Space

Benefits

- Cornell can manufacture and ship most standard service doors in one to two weeks.
- Powder coated guides, bottom bar and bracket plates are standard.
- Size Flexibility - each unit is built to exact opening size requirements.
- Compact Storage - curtain stores in an overhead coil that is totally supported by the side guides.
- Low Life Cycle Cost - rugged construction and commercial quality materials assure long life.
- Maintenance - little to none.
- Repairs - job records are retained and parts are readily available.

Available Options

- Vision windows
- Perimeter weather-stripping
- Cylinder or slide bolt locking
- Bottom bar sensing edge for motorized units
- Project specific wind load
- Operator covers for exterior mounted units or exposed operators below 8'-0" high

Specialty Service Doors

Matadoor®

A highly visible safety orange colored breakaway curtain bottom section that controls damage and opening downtime.

ScreenGard Door

Achieve visibility and ventilation while maintaining security and insect control. Perforated 20 ga. steel slats provide approximately 22% open space.

Graphics Door

Durable, full color images applied to door curtains and hoods. Create sponsorship opportunities, educate, inform or add aesthetic interest.

RapidResponse Door

When impacted, extra curtain slats at the bottom of the curtain can be quickly removed and the door can be returned to normal operation during the initial service call.

Service Door Components

Operation

Push-up operation shown. Hand chain, hand crank and motors are available. Doors operate by rotating the shaft gear end. The opposite end of the shaft applies spring tension and is equipped with a spring adjusting wheel.

Mounting & Clearances

Standard service doors are built to order to fit specific dimensions up to 30' wide, 30' high standard construction. For large openings up to 50' wide by 40' high, consult the factory.

Special Applications

- **Specified Wind Load** - doors can be configured to withstand the full range of specific wind load requirements. Third party performance validation.
- **High Cycle Construction** - for doors expected to operate more than 20 cycles per day such as parking garage doors, sally ports and certain industrial applications.
- **Fast Acting Doors** - doors designed to operate at a speed of 2 feet per second - more than twice the speed of typical rolling doors.
- **Horizontal Closures** - close off floor openings or cover tanks or machines.
- **Combination Doors** - combines two different curtains on the same opening. Typically an insulated door is used in conjunction with either a ScreenGard™ door or an open design rolling grille.
- **Craneway Doors** - have curtains designed in the shape of a "T" to accommodate overhead crane rails.
- **Sloping or Irregular Sills** - special bottom bar designs meet odd floor conditions including slopes, curbs or rails.
- **Pass Doors** - a hollow metal man door and hinged frame within a rolling door curtain.
- **Removable Guide Mullions** - for wide openings that require full access on a limited basis.

Optional Finishes

- Galvanized Steel with exclusive GalvaNex™ Finish in Gray, Tan, White or Brown
- Aluminum in Mill, Clear or Color Anodized
- Stainless Steel, 300 Series #4 Finish
- Hot-dip Galvanizing on Steel components
- Powder Coat Finish in selected color
- Zinc Rich Gray Corrosion-Resistant Powder Coating

SpectraShield® Powder Coat Finish

Cornell's SpectraShield® Powder Coat Finish adds durability and aesthetic value to our products in a choice of over 200 colors. Surface preparation and the coating process produces a smooth, long lasting finish at controlled costs.
